

Charlie Roughton Won West Kootenay Tennis Championship

TRAIL, B.C., Sept. 4.—Young Charlie Roughton, Coleman, took the hearts of players and gallery alike by his plucky and outstanding performance in international tennis tourney here over Labor Day. He copped junior singles title after defeating P. Dewdney, Nelson junior star, in three sets first round, and then met two Spokane, Wash., entrants which he despatched in fine style. He met George Murray, Trail ace, in finals and by his steady play and easy stroking completely befuddled him to take the title in straight sets 6-1, 6-0.

The slim youngster also entered in the open singles and men's doubles event, despite his youth. In the singles he survived three rounds, finally being despatched by Don Mathews, Vancouver, after downing Spokane ace, Art Remmel in straight sets. Mathews met the youngster late in the afternoon when Roughton had been playing steadily all day and had had nothing to eat since breakfast, and finally tired him out completely.

After a night's sleep, Roughton came back the next day to last three rounds in the men's doubles, paired with R. Shone, also Coleman. They defeated strong Vancouver combination of Godfrey and Mathews, who had been forced to reach finals. Finally forced to bow to Spokane team, who progressed to finals.—Lethbridge Herald.

Death of Primo DeCocco

Announcement was received this week of the death of Mr. Primo DeCocco, who died at his old home in northern Italy on August 17, and was buried there the following day. He left here last May in the hope that a change would benefit him, after being ill for a considerable time.

He came to Coleman about 1909, was married here in 1914, and is survived by his wife and son Feruccio and daughter Linda, the latter being a nurse-in-training at Edmonton. For many years he worked in the boiler house at the International mine, and was 53 years of age. The sympathy of a large circle of friends is extended the widow and family in their bereavement.

LOCAL AND GENERAL

Mrs. Nicholas and family returned on Tuesday from a three-week holiday at Seattle and other coast cities. Mr. and Mrs. Pearn, of Calgary, were visitors at the home of Mr. and Mrs. Walter Dibble during the week.

A daughter was born to Mr. and Mrs. Edward Wood on Saturday, September 1st.

Mr. and Mrs. Fred Antrobus and Freda spent the week-end on a motor trip to Nelson. B.C. roads leave a lot to be desired, states Mr. Antrobus.

Mr. and Mrs. Lonsbury and William were visitors to Trail over the week-end holidays. Mrs. Nash, Helen and Norah Easton accompanied them.

Showers in honor of Mrs. Leslie Griffiths, (nee Virginia Olson) were held last week at the home of Mrs. Hopkins and Mrs. J. T. Griffiths, when the guest of honor was the recipient of many handsome and useful presents.

Mr. George Reid was a high point winner at the Bellevue exhibition on Monday, when he captured four firsts, three seconds and one third prize for his poultry entries, which consisted largely of White Leghorns and Black Minorcas. He also won the special prize awarded for the best hen at the show. This is the third year he has taken this award.

WHIST DRIVE AND DANCE

The I.O.O.F. hall, Coleman, will be headquarters for a whist drive and dance on Saturday, September 8th, commencing at 8 p.m. sharp. Good lunch and good music. These socials will continue every Saturday night until further notice. Admission 50c. You're invited!

Anyone found or convicted of trespassing on the rink building or property will be prosecuted to the full extent of the law.

More Protection Needed

Retail merchants, it is reported, will circulate a petition urging that a night policeman be steadily employed to guard against burglary and fire.

MISCELLANEOUS

Attention is called to the display advertisements of Coleman merchants. They strive to please and you'll find values the equal of big city stores.

Mr. and Mrs. Sam Howarth and son John made a motor trip to Coeur d'Alene, Spokane and various other places over the week-end.

There are so many local admirers of the Readers' Digest, an American publication, that it may interest them to know that the joint editors, Lila Belle Acheson and her husband, DeWitt Wallace, are Canadians. Miss Acheson was born on a homestead at Virden, Manitoba, and incidentally is a cousin of Arthur Meighen. While engaged in teaching on the American side, she met and married DeWitt Wallace, whose father was a native Canadian. The young people plunged their entire capital of \$700 into venturing the Readers' Digest. It caught public interest at once, and now is one of the largest circulations in U.S.A. It has also made a fortune for them in the space of thirteen years. So frequently have Canadians found opportunity and advancement amongst their cousins to the South that some one has remarked that Canada is to United States what Scotland has been to England. These rugged north-ers.—High River Times.

ASK! ASK! ASK?

He who asks most gets most. There is no escaping this truth. It is something like the tortoise and the hare. The race in business is not to the swift, nor to the clever, nor to the brilliant man, but to the man who is most diligent to the man who keeps on doing his plain duty.

You are a retailer. You want to get on. You want to swell each day's sales. Well, you will sell more each day if you ask! ask! ask! buyers to buy your goods.

You can hardly go round canvassing homes and buyers face to face. This practice would be too costly, though undoubtedly would be effective. But you can use newspaper advertising; in this way you can do your asking for business. You are not required by the buying public to do smart advertising. The public doesn't like smart or clever advertising. The public just wants to be informed about what you have to sell, and if you will add reasons why the public should buy what you offer, then you will get more customers. The public wants information, and it won't object to a little urging. Spending money is for the most persons quite a serious business, and so they like retailers' advertisements to be plain, straightforward statements of fact.

IN MEMORIAM

IN LOVING MEMORY of our dear son, Albert Brocklehurst, who died on September 8, 1928, at Coleman. Ever remembered by his loving parents, Mr. and Mrs. Samuel Brocklehurst, Calgary.

Potted flowers or choice cut flowers direct from the nurseries may be ordered from Frank H. Graham at the post office, or by telephone 42, C. B. Cigar Store, or 81 W. residence.

Elks Lodge

Institution of lodge No. 117, B. P. O. Elks takes place Friday evening Sept. 7 in the K. P. hall and all applicants are urged to be there at 7:30 sharp when election of officers of new lodge will take place, followed by initiation of new applicants. Ceremonies conducted by officers of Blairmore and Fernie lodges, concluding with banquet and smoker at Grand Union Hotel.

Second Death from Auto Crash

The second death arising from the auto crash of Aug. 19 in Calgary, when Mrs. Edith W. Clemes, of Toronto, was killed, was recorded on Aug. 30 when Charles Patrick Beach, who was driving the car in which Mrs. Clemes was riding, died in hospital. Mrs. Clemes, a daughter of Mr. and Mrs. J. J. Warren, and a sister of Mrs. H. V. Hummel, was visiting the city and the body was forwarded to Toronto for burial. Robert C. Phillips, of Regina, who was driving the car which crashed into Beach's car, is out on \$10,000 bail to appear on Sept. 7 on a charge of manslaughter.

Local Girl Accidentally Shot

Irene McLeod, aged 10 years, was accidentally shot in her home on Sunday, by a bullet from a 22 rifle. Her brother, William, saw a rabbit in the vicinity of the house at Carbondale, and loaded the rifle to shoot it, but it had disappeared and he left the rifle standing against the wall of one of the rooms. Irene tripped against the rifle, which discharged, the bullet entering her abdomen and taking an upward course lodged in her breast. It was extracted by the doctors who operated at the hospital.

MISCELLANEOUS

Mrs. Wood, matron of the Miners' hospital, returned last week from her vacation in Vancouver.

Jim Yates recently shot a coyote at a range of 200 yards, while hunting near Coleman.

Born To Mr. and Mrs. Edgar on Saturday September 1, a daughter.

Mrs. R. P. Borden and Prue left on Sunday by train for Calgary where Prue will remain to attend St. Hilda's boarding school.

G Hope and Steve Ondrus are spending a short vacation at Banff. A Kay of Arrow Lakes is also enjoying the beauty of Banff in company with Mr. Hope and Mr. Ondrus.

J. D. S. Barrett, formerly editor of The Coleman Journal, is now residing at Abbotsford, B. C., where his brother, Eugene A., is postmaster.

Rev. and Mrs. Roy Taylor and family arrived home on Friday from Vancouver where they have been vacationing during the last two months.

Rev. and Mrs. A. S. Partington and Mary returned last week from a holiday trip at Winnipeg. Frances remained to spend the year in the east, the guest of her aunt and uncle.

T Holstead of The Journal office is on two weeks vacation, and with Mrs. Holstead and Audrey is spending part of his vacation on the ranch of Mr. and Mrs. Brown at Spring Point in the Porcupine hills.

Mrs. Stephenson, who recently returned with her sons, Bill and Bert, from a visit at Salt Lake City, states that one of the worth while features of the trip was hearing the great organ in the Temple there. The scenery in Yellowstone Park was also very impressive, adding to the pleasures of the motor trip.

Twice in recent weeks Coupland's store at Bellevue has been broken into by a person evidently of small stature, for he entered through a space which a man much smaller than average size could squeeze through. The last time he got in he tried to steal meat from the refrigerator, as he had done on a previous occasion, but it was fastened in a different way and he was unsuccessful.

Hospital Given Fine Report

The provincial inspector of hospitals, who recently visited Coleman gave a very high rating to Coleman Miners Union hospital, stating it was among the best in the province for its size. The board were well pleased by the report, and the members are J. Glendenning, chairman; J. Griffiths, secretary; G. Burchell, G. Ford, Walter Nelson, Ernest Hill, J. Atkinson jr. The staff includes Mrs. Woods, matron, Miss Moore and Miss Stewart, nurses.

June Output Showed Increase

The Western Canada Coal Review, giving figures for Alberta coal production for June, shows that Crow Nest (Alta.) field produced 102,383 tons as against 89,164 for the same month last year, an increase of 13,194 for the field.

For the whole of Canada, June production was 40 per cent higher than last year. Coke production was also higher for Canada.

Stabilizing Coal Industry

Mine operators of Drumheller district have formed a company incorporated as the Drumheller Coal Operators Limited to establish a plan of stabilization for output of mines which are members of the company. Mines will be placed on a quota basis for tonnage, and it is anticipated that the arrangements will result in benefit to workers and employers. Sixteen companies have joined the new organization, and the co-operation of distributors and retailers of coal will be sought to make the plan successful.

Misses Ethel Wilson, Ethel and Audrey Dunlop left by train for Calgary on Friday. Audrey is remaining to attend Normal there.

Mr. and Mrs. Norman Shaw and children returned to Calgary on Sunday after spending a two weeks holiday at Crow Nest lake.

Shower for Norma Plante

Mrs. E. V. Peat and Mrs. J. Lonsbury were joint hostesses at a hankchief shower given at the home of Mrs. J. Plante in honor of Miss Norma Plante, who is entering the Royal Jubilee hospital at Victoria this week.

During the evening Court Whist was played, the prize winners being Mrs. I. Nelson and Mrs. J. Nash. Those present were: Mesdames Peel, Lonsbury, Nash, Ford, Evans, Willey, Boulton, Higginbotham, Campbell, Neilson, Easton, Gate, Duffield, Shields, Plante, and the Mesdames Norma and Verda Plante.

Create the goodwill of Coleman people by inviting them to purchase from Coleman stores by advertising in The Journal. Bright, well printed advertising messages, easily read, messages with forceful appeal, published in the newspaper which is published in Coleman for Coleman people, are taken home and read by the whole family. Copies are on sale at McBurney's store, Palm Confectionery, Bellevue drug store, Blairmore drug store and delivery boys sell same every Thursday. Coleman boys are Armand Celli, Billy Naylor; Hillcrest, J. Norton, jr.

UNITED CHURCH

Services for Sunday, Sept. 9.—Sunday school classes for boys and girls of all ages invites co-operation of all parents in making this branch of the church effective in laying the foundation of Christian character.

At the morning service the minister will take as his theme "The Validity of a Conviction." Have we clarity of thought on the real issues of life? Are we willing to stand by our convictions?

At the evening service the subject will be "Are Ye Willing," and the answer, "We are able," a challenge to adventurous religion.

You are invited to attend these services, where a welcome awaits you.—Rev. Roy C. Taylor, minister.

Local News

Mr. and Mrs. J. Wilson spent the holiday at Lethbridge.

Miss Mae Moores left on her vacation this week for Creston where she will visit friends.

Mr. and Mrs. J. Salvador and family are Trail visitors this week, the guests of friends.

Mr. H. Hartley and daughters of Winnipeg are the guests of Rev. and Roy C. Taylor.

Mayor Pattinson left Wednesday for Calgary where he is a business visitor.

Miss Emma Antel left last week for a town 33 miles north of Edmonton where she has accepted a position as school teacher.

Boy Scout and Girl Guide Notes

Coleman Troops

The Boy Scout troop and Scoutmasters motored to Lee Lake on Monday where the members of the Troop were put through their first class swimming tests. The following Scouts were successful in passing the test: R. Rippon, F. Sharp, O. Jones, L. Carrol, S. McLeod, J. McLeod, R. Taylor, R. Emmerson. The following also passed for swimmer's badge: R. Emmerson, Roy Taylor, O. Jones, F. Sharp. Troop and Scoutmasters wish to thank all who made this test possible by providing transportation.

Attention

There will be a meeting of the Girl Guides in the Parish hall at 6:30 on Monday, Sept. 10. All those wishing to join, as well as the regular members, should be present.

OGDEN'S CUT PLUG

Soviet Claims Scouted

Claims from Moscow that Russia had usurped second place among the world's gold producing countries, superseding Canada, has been received with almost universal scepticism. Apparently, the statement has been interpreted as just another of those efforts in propaganda with which Soviet authorities keep their people in a further sacrifice, but which singularly fail to impress the outside world.

During progress of the first five year plan, Moscow deluged the world with claims of amazing achievement, which, now that the ardors of the period have subsided, are being assessed at their true worth. There is no gainsaying the great advances made in certain industries, particularly the so-called heavy industries, under the program initiated by Lenin and carried into effect by Stalin. In some instances these have been spectacular, but and this is the rub) seldom have they been quite as significant or outstanding as the claims made concerning them.

Several of the leading magazines and newspapers of Britain and America are devoting considerable space to reviewing the Soviet industrial and agricultural achievement. These have been equitable, unprejudiced and, probably based upon the true facts, for truth and not antagonistic propaganda is what the public seeks these days. The claims made on behalf of socialist endeavor by Socialism of the Russian variety, apparently do not stand the test of statistical investigation. Alan Monkhouse, one of the British engineers sacrificed for propaganda purposes in the notorious sabotage trials of a year or so ago, in a book of his experiences in Russia is surprisingly sympathetic to the Soviet planning scheme in the light of the circumstances preceding his deportation. Paying some attention to the statistical record of industrial achievement, he shows that the Soviet government's own figures in specialized lines such as house building do not compare favorably with similar achievements in capitalist and individualistic England, recorded at the same time. He cites several paragraphs in which Soviet authorities claimed to have out-distanced their degenerate and collapsing capitalist contemporaries, which are not substantiated by the facts.

Apparently, the same is true of the gold production, backed by Russia threats that, having overtaken Canada they will shortly overtake and pass South Africa in production of the precious metal. In reply to this, Canadian mining authorities maintain that, while undoubtedly Russia has been creeping up in production, it has not yet supplanted Canada as ranking second in production of newly mined gold. Much of the Russian gold, it is claimed, was withdrawn from hoarding and, therefore, it is old gold reclaimed.

South Africans scoff at what they term a bombastic claim, and have no fear of losing premier place among the world's gold producers. This contention is backed by Dr. F. S. Nazarov, formerly a famous Russian geologist and now a fugitive from the Bolsheviks. His statement, based on actual knowledge of the various Russian goldfields and not upon political bias, is to the effect that nowhere in Russia do gold-laden bodies occur with the regularity and in the volume seen on the Rand in South Africa. "If Russian gold fields ever reach the stage of providing competition for South Africa it will be at tremendous cost of time and labor of transportation," he concludes.

Salvaging Gold From Chimney

U.S. Assay Office Reclaims It From The Soot

Since the U.S. government devaluated the dollar, doubling the dollar value of every scrap of gold, the Assay Office in New York has been using every conceivable precaution in its melting room to conserve the metal. The Assay Office is housed in a relatively new building, white and severe, at the corner of Old Slip and South Street. One of its important installations is called a fume precipitator—in reality, a series of metal sieves, each plumbly by a chain. Alternating currents run through the chains and the sieves; and, as smoke passes up the chimney, the soot particles containing minute quantities of gold, are dashed from the air by this electric barrage, and fall to the bottom of the flue. This precious residue is collected once or twice a year by men who go into the basin of the chimney and shovel it out. The Assay Office realizes \$10,000 to \$15,000 on the sale of gold reclaimed from chimney soot. Even the dust on the walls is collected for gold.

Easy To Remember

The debate over "I" and "me" goes on unendingly, but there is one thing that we ought to stop. It is the phrase, "between you and I." If the people who use it would reverse the pronouns and say "between I and you," they might learn to use the correct form, but every day we hear from the most unexpected sources the heart-rendering "between you and I." The correct form, of course, is "between you and me."

Change of Climate, Diet, Water Often the Cause of Diarrhoea

If you are suddenly attacked with Diarrhoea, Dysentery, Colic, Cramps, Pains in the Stomach, Summer Complaint or any Looseness of the Bowels, do not waste valuable time, but get a bottle of Dr. Fowler's Extract of Wild Strawberry and see how quickly it will relieve you.

This bowel complaint remedy has been on the market for the past 38 years. Proof enough that you are not experimenting with some new and untried medicine.

Do not accept a substitute. Get "Dr. Fowler's" when you ask for it, and be on the safe side. Put up only by The T. Milburn Co., Ltd., Toronto, Ont.

Was In Two Rebellions

Alberta Veteran Carried Despatches For General Strange

In Alberta 50 years ago, when highwaymen were just fading from the western frontier with the coming of the first Northwest Mounted Police, and when Indians were still on the warpath often, Charles F. Stewart drove the mail stage. Now 69 and retired, he lives at Edmonton.

Native of the prairies, he saw two rebellions at first hand. Son of the chief factor of the Hudson's Bay Co., he was a lad of eight and lived a few miles below Fort Garry (later Winnipeg) in the troubled days of the first Red River rebellion. He can recall seeing the soldiers coming up the Red river. As a youth of 20, when the mails were stopped by the Saskatchewan rebellion of 1885, he went on the courier line, carrying despatches for General Strange's Alberta field force. He made several trips on horseback between Saddle Lake and Fort Pitt.

His predecessor on the mail job, Peter Campbell, was on the driver's seat when the Calgary coach was held up and the mails robbed by highwaymen in the only case of its kind in this part of the west.

It was no picturesque coach that was in use in 1891 but a lumber wagon with an open centre for package freight and a closed cabin on the rear that accommodated six passengers. An average of 40 miles of trail was covered each day by the plodding team and numerous creeks and streams were forded on route.

Proposed Tax On Noise

Idea Of British Minister Of Transport May Save Nerves

A tax on noise has been proposed to save the nerves of the people of the United Kingdom. It is thought that taxation may succeed where all appeals have failed in the matter of unnecessary noise, and the suggestion of a tax was made in a letter from Leslie Hore-Belisha, minister of transport, which was read at a conference of the Anti-Noise League at Oxford.

"All new heavy motor cars put on the road since January, 1933, have to be fitted with pneumatic tires," he wrote, "and the scales of taxation have been so framed as to give a strong incentive to people to substitute pneumatic tires on existing vehicles. The heavy vehicle on solid tires which caused so much unnecessary noise in the past is rapidly disappearing."

"Regulations also forbid the use of motor vehicles and trailers which have caused excessive noise, and the sounding of horns on stationary vehicles."

"The road traffic bill proposed further to prohibit the use of the horn in prescribed hours and zones of silence." Mr. Hore-Belisha stated that in order to gain exact knowledge of what really causes noise the ministry has invoked the best scientific assistance. He expressed the hope the motor manufacturing industry will co-operate with the government in a determined effort to find a remedy for present unnecessary and harmful noises.

Rebuilding Viking Boat

Oak Timbers Intact After Being Submerged Thousand Years

A Viking boat, once "reconditioned" at Danzig, after one thousand years. Workmen engaged in digging a ditch at Oliva found the remains of a boat, the hull of which lay beneath the surface of the ground. The sturdy oak planks of which the boat was originally built had defied the ravages of time so successfully that it has been possible to reconstruct the vessel in its entirety. The boat is thirty feet long, with places for eighteen oarsmen. Iron nails had been used in the making, as well as wooden pegs. Parts of the gunwales, with the original rowlocks, have survived, and much of the moss with which the seams were packed to make them water-tight is still in place.

Wine must come from a limited area of France to be legally called champagne.

Talk About Economy

Two Towns In Bulgaria Have Everything Else Beaten

There is a legend current in the picturesque little Balkan town of Panagurishke that when God once was bestowing his gifts, he allotted close-mindedness to the inhabitants of two towns—Gabrovo and Panagurishke, stressing it more generously on the latter because of its weird and unpronounceable name.

On that account the parsimoniousness of either town has become proverbial. And they are dire rivals in that respect to this day. In both localities men do not shave their beards, being too expensive a matter, but shave them by various devices which makes the beard stay smooth. In both towns families make use of but one spoon or fork, passing either of them around when taking their meals which they argue, saves extra labor, and what is more important, food lasts longer, as each member of the household thus must await another turn for a mouthful.

The aged people say that this method of eating prevents one from overeating, saves him from indigestion and many other stomach ailments, due, they assert, to the use of too many spoons, forks, knives, and too many dishes.

In both towns hats and shoes are considered superfluous luxury, which may be resorted to only in winter and on holidays. And even on those occasions people often prefer carrying their hats and shoes in their hands to save tear and wear.

Million Miles Her Objective

Elderly Woman Traveller Expects To Make Real Record

An interesting old lady who can probably lay good claim to the title of world's champion traveller is Mrs. Ella G. Munson of East Rockaway, Long Island, who has sailed from Montreal to add the Saguenay district to her list of places visited. Mrs. Munson has travelled close to 700,000 miles and at 72, hopes to bring her total to 1,000,000.

In all her travels, which include 53 trips across the Atlantic and 10 across the Pacific, Mrs. Munson has never encountered a severe storm nor an accident. She has tried almost every known method of transportation, including camels, elephants and rickshaws, but has never yet been in a plane. Only one thing could induce her to fly, she said, and that was an invitation from Col. Charles A. Lindbergh to go up with him.

Mrs. Munson's trips are seldom planned in advance. She stays at home until the urge to travel comes, then she packs her trunks and is off. "I can get ready to go around the world in 24 hours," she said.

Mrs. Munson was somewhat at a loss to explain her wanderlust, as her ten brothers and sisters are all "stay-at-home bodies," but thought she might have inherited it from Captain John Munson, an ancestor who in 1642 led the pilgrimage of Munsons to Massachusetts.

Looked The Part

He was a golfer who always played in his oldest clothes. One day he set out for the course, his clubs slung over his shoulder.

Walking down a street he saw a woman leaning over her garden gate, eyeing his approach angrily.

"You're very late," she said, sharply, as he drew level.

"Late?" echoed the astonished golfer.

"Yes, late! You promised to sweep my chimneys at eight, and it's past nine o'clock now."

Around the World Cruise

Cunard White Star Liner To Make Interesting Calls At Many Ports

Preliminary enquiries throughout America indicate that the 1935 Around the World Cruise of the Cunard White Star liner Franconia will be well booked up. The Franconia will follow the route around the Southern Hemisphere as she has done during the past two seasons. Her first port will leave New York on Saturday, Jan. 12, and sail south for her first port of call at Kingston, Jamaica. Here there will be a drive to Spanish Town and other points of interest for passengers.

Leaving Jamaica on the 16th the Franconia arrives at Panama on the 18th, calling at Cristobal. A daylight passage of the Panama Canal is made, with an auto drive to Colon, Ancon, Panama City and Old Panama.

The Franconia calls at San Pedro in California to allow Westerners to embark for the cruise and also to permit passengers to drive to Los Angeles, Hollywood, Beverly Hills and other famous California resorts.

Crossing the Pacific the Franconia will call at the Hawaiian Islands, where two days will be spent from Feb. 2 to Feb. 4. The itinerary here calls for tours to Hilo and Honolulu, the Lava Tubes, the Kilauea Volcano, the Fern Forest, Diamond Head and Waikiki Beach. An unusual call will be made in the Society Islands at Paape (Tahiti). Here preparations are being made for entertainment and dancing by natives to amuse the passengers. Cook Islands will be visited two days later and there will be a permit to drive to Rotorua and Tonga, with native dancing at Avarua.

Recalling the late Louis Stevenson, a visit will be made to Valima, his home in Apia in the Samoan Islands. The famous "Siva" or native dance will be performed in Apia.

The Franconia then sails on to the Fiji Islands, with a motor drive into Suva, where there will be "Meke" or tribal dances performed. The Franconia will also visit Auckland, where two days will be spent in New Zealand; commencing with a motor drive from Auckland, a two days tour to Rotorua and the famous Thermal district, with visits to Maori villages. Two days will be spent to add a motor drive in and around Sydney, including visits to the famous beaches, the New Bridge, Koala Park Farm and the Sydney Zoo, a special exhibition of boomerang throwing will be arranged at the native settlement of Penrith.

From Sydney, where there will be two days trip over the Blue Mountains to Mount Victoria and the Jenolan Caves.

March 11 finds the Franconia at Port Moresby (Papua) New Guinea. A visit to the Pagan village at Hagen, where there will be tribal dances by natives. Another unusual port of call for the Franconia will be in the Lesser Sunda Islands with a visit ashore at Kalabahi. A day later will be spent in Bali at Telok Padang with visits to temples and magnificent scenic points. There will be an exhibition here of native arts and crafts and Balinese dancing. Two days will be spent in Java. There will be an auto drive around Semarang to Batavia and Buitenzorg, visiting the famous Botanical Gardens.

The Franconia will call at Singapore, March 24. There will be visits to the "Forest in the Forest" in the Malay Straits, the Botanical Gardens, for instance, and Penang Hill. The Franconia sails to South India, arriving at Madras on the 30th and calls at Ceylon early in April. There will be visits in and around Colombo and Mt. Lavinia, as well as to Kandy and the Botanical Gardens. A unique port of call will be Port Victoria in the Seychelle Islands with a motor drive to the Islands of Mahe, where an exhibition of native arts and crafts has been arranged. Kenya will be next visited, with a call at Mombasa. A "ngoma" or series of tribal dances will be performed at Kilindi. Next comes Zanzibar and Madagascar, visiting Majunga, one of the most interesting ports in the Indian Ocean. Three days will be spent in the Union of South Africa, with drives in and around Durban and an excursion to Pietermaritzburg. Port Elizabeth and Cape Town with optional tours inland as desired.

The Franconia then makes a long voyage across the South Atlantic to Montevideo and in Uruguay and passengers may visit Buenos Aires by special steamer. Turning north the cruise liner arrives at Santos and Rio de Janeiro, where there will be visits to a sugar farm, the former city and to the magnificent scenic points in the capital. The last port of call in the Americas will be at Barbados, arriving back in New York on Friday, May 31. She will have touched at 35 ports on her 139-day cruise, covering 37,000 miles. The Franconia is at present engaged on a series of cruises between New York and the St. Lawrence, calling at Newfoundland, the Saguenay and Quebec.

Decline In Cheese Exports

Canada Is Losing Market Of United Kingdom

What has happened to Canada's exports of cheese to the market of the United Kingdom is clearly indicated in a statement of the Bureau of Statistics at Ottawa that during the first six months of the present year our shipments of cheese to that market actually fell to fifth place with only 30,842 cwt. being forwarded. Canada's production of cheese, dedicated in a statement of the Bureau of Statistics at Ottawa that during the first six months of the present year our shipments of cheese to that market actually fell to fifth place with only 30,842 cwt. being forwarded. Canada's production of cheese, dedicated in a statement of the Bureau of Statistics at Ottawa that during the first six months of the present year our shipments of cheese to that market actually fell to fifth place with only 30,842 cwt. being forwarded. Dominion Government's New Debt Legislation Comes Into Effect

Ottawa.—Insolvent farmers in Alberta, Saskatchewan and Manitoba will now be in a position to take advantage of the Dominion government's new legislation under which they will be privileged to arrange their debts along the lines of ordinary assignment procedure without the odium of bankruptcy itself and without lessening their means of obtaining a livelihood.

Proclamation of the act will respect to the three prairie provinces has become effective and it is anticipated that the measure will be proclaimed effective in Ontario and Quebec for October 1.

Official receivers which the act requires to be set up in each judicial district in the provinces concerned, have been appointed for Saskatchewan and Manitoba, and the Alberta list will be announced soon. Hon. E. N. Rhodes, minister of finance, has jurisdiction over operations of the act.

The official receivers for Saskatchewan have been selected as follows: George T. Killam, Foam Lake; George McIntosh, Vonda; A. R. Colman, Kindersley; George Braden, Rosethorn; Nathaniel Givens, Delisle; W. O. Fraser, Oxbow; Peter McLaughlin, Arcola; Andrew M. Percival, Plenty; W. W. Smith, Swift Current; Norman R. McDonald, Weyburn; M. A. Munns, Moose Jaw; G. C. Neff, Grenfell; John M. McLennan, Orkney; J. E. McLarty, Denholm; H. M. Buxton, Thebarton; J. P. Fewell, Unity; W. R. Kinsman, Regina; W. R. Steele, Melville, and E. L. Elliott, Assiniboia.

Procedure under the Farm Debt Adjustment Act will involve preparation of a form of composition by the official receiver when a debtor applies for relief, and an attempt by that official to secure acceptance of the plan by the creditors. Failure to secure such agreement will be followed by presentation of the case to a judicial board later to be established in each province as necessary, and the plan of settlement as approved by such board and accepted by the local courts will be binding upon both parties. Settlement over a long term will be based on the farmer's assets and his potential ability to pay.

Project Not Justified

This Is Opinion Of Mining Engineer Regarding Northern Railway

North Bay, Ont.—Arthur A. Coleman, mining engineer of the Temiskaming and Northern Ontario Railway, told Commissioner Armand Racine he did not believe mineral deposits along the railway were of sufficient value to justify construction of the road from Cochrane to Moosonee on James Bay.

Mr. Coleman was testifying before Mr. Racine's inquiry into the working of the railway. He said construction of 186 miles of railway between the two points had cost \$12,138,649 and that fur trade and tourist traffic are the chief business possibilities of the Moosonee area.

Annual operating deficit was \$847,000.

Must Have Data

Edmonton.—Data will have to be obtained from other provinces of Saskatchewan and Manitoba before there can be a final announcement concerning the movement of settlers northward from drouth areas, states acting Premier Hoadley. The minister said that full information concerning the Alberta problem had been submitted to the Ottawa authorities.

Rust-Resistant Wheat Development Expected To Be Boon For Farmers

Toronto.—F. C. Nunnick, director of publicity for the Dominion agriculture department, intimated discovery of a rust-resistant wheat was not far off and he added information on the matter would be released soon.

As soon as it has been proven beyond all doubt the variety of wheat would resist rust, the information would be made known, he declared. "We have been working on it for a number of years," he said, "but we expect to be able to give it to the western farmers soon."

He declared the department re-

Grierson Lands At Ottawa

British Flyer Negotiates Air Ship Over Northern Route

Ottawa.—Greatly fatigued but gratified at reaching his goal, John Grierson, the intrepid aviator who set out from Rochester, England, July 20, to conduct a survey flight to Canada via the northern route, reached Ottawa safely. The last stage, from James Bay to Ottawa, was accomplished in 5½ hours.

The bright-eyed gypsy moth of the tall and slender flyer was sighted west of the Ottawa air station at 1:20 p.m. C.S.T., following for a brief space the course of the Ottawa river, Grierson encircled the flying field and brought his seaplane to a three-point landing on the surface of the river, directly opposite the Royal Canadian Air Force camp.

First to greet him were Wing Commander A. E. Godfrey, D.F.C., officer commanding the air station, and Wing Commander G. O. Johnson, of the R.A.F. headquarters staff.

Since leaving Kouvuntuk, on the eastern shore of Hudson Bay, the flyer had been practically out of touch with Canadian wireless stations. Throughout the whole of the final stage the flyer had to use his compass. Prior to that, however, fog over Hudson Bay forced him to hug the coastline closely.

Mr. Grierson declared his flight had been undertaken entirely on his own. Its purpose, he said, was to make a survey of a possible airmail route from the United Kingdom to Canada.

May Become Permanent

Ontario Government Likely To Abandon Farm Loans Policy

Toronto.—The Mail Empire says early abandonment of Ontario's farm loans policy is rumored at Queen's Park.

The paper adds: Hon. Duncan Marshall, Ontario minister of agriculture, is reported to be fearful of collecting anything like the \$55,000,000 which the province has now out with the farmers and for that reason is said, on coming into office, to have ordered the suspension which now, to all appearances, may become permanent.

If the present policy is abandoned, the paper says, it is likely the entire staff of the agricultural development board, including W. Bert Roadhouse, chairman, will be dispensed with and only a bare skeleton of the organization retained.

Threaten Trade War

Answer To Australia's Tariff On English Cotton Goods

London.—Rumblings of a trade war with Australia have been heard in parts of England.

Bolton grocers pledged themselves not to sell or stock Australian goods. London shipping authorities commented bitterly on the shipment of Australian grain to Europe in non-British bottoms.

At Bolton, Lancashire, one of the principal seats of English cotton manufacture, grocers initiated a boycott against Australian products. This was their answer to Australia's tariff on English cotton goods and stipulated to last just as long as the tariff was in force.

Two hundred retailers in Bolton and the surrounding region, in addition to the Bolton special committee's principals, pledged their word.

Rust-Resistant Wheat Development Expected To Be Boon For Farmers

results in the task "are very encouraging" and it remained only to be proven "over a long period of time." "Beyond that I can say nothing more at the present time," he declared.

Such a type of wheat would mean millions of dollars to the western farmer whose crops have suffered from rust.

Mr. Nunnick said the department also was working on a type of wheat that would combat saw-fly attacks. With a solid stemmed wheat, he added, the saw-fly would be unable to bore into it.

Drouth Problem

President Beatty of C.P.R. Opposed To Moving Settlers From South Moose Jaw.—"The problem of the drouth areas in southern Saskatchewan cannot be solved by moving the people to other parts of the province. This would be unfair to the people involved, unfair to the drouth areas and a great mistake for the province," said E. W. Beatty, chairman and president of the Canadian Pacific Railway Company, in an interview here.

"The solution of the problem lies rather in the governments standing by the farmers with required assistance to bring them through the emergency, coupled with soil conservation on lands adapted to grain growing, and the development of grazing land for grazing purposes; and a policy of water development and conservation for use on the farms," Mr. Beatty said.

By water conservation and development, Mr. Beatty explained, he did not mean large schemes for irrigation works, which experience in this country had shown to be too expensive for the returns possible, but rather the development of adequate water supplies for farm use, including stock growing.

New Mining Company Has Been Incorporated

Capitalized At Ten Million And Will Promote Gold Production

Toronto.—Canadian Gold and Metals Mining Company, Limited, with authorized capital of \$10,000,000, has been incorporated and will launch into the mining field shortly to promote gold production and to provide a medium for investment in mining securities.

Fifty per cent., or \$5,000,000, of the company's capital is to be invested in dividend paying mining stocks listed on a recognized exchange, or government bonds. Twenty per cent. is to be invested chiefly in mining stocks listed on an exchange but not necessarily dividend paying, and the remaining 30 per cent. is for speculative purposes.

Among the directors are Sir Henry Drayton, K.C.; Hon. W. D. Ross, J. W. Hobbs, E. W. Beatty, K.C., president of the Canadian Pacific Railway and David Sloan, of Vancouver.

Prairie Wheat Crop

Yield Is Estimated At 200,000,000 Bushels For Three Provinces

Winnipeg.—A prairie wheat crop of 205,000,000 bushels, 14,000,000 bushels higher than last year, was forecast in the weekly crop survey issued by the Weekly Market News on wire reports gathered by the Sanford Evans' statistical service.

The estimate was the first this year based on extensive reports from Manitoba, Saskatchewan and Alberta. The Manitoba production was estimated at 35,000,000 bushels; Saskatchewan, 115,000,000 bushels; and Alberta, 115,000,000 bushels.

Eighty-four per cent. of the wheat crop has been cut and 30 per cent. threshed, the report said.

Free Trip For Student

Toronto.—A free trip to Australia will be given to the collegiate or high school student in Canada writing the best essay on Australia. This step is being taken to stimulate interest in travel and the announcement made at the Canadian National exhibition here by officials connected with the Australian exhibit said \$500 also would be given for the best essay on the same subject in each province.

SCENE OF \$427,000 HOLD-UP

In the foreground is seen the push-cart which concealed the machine gun used by the Brooklyn bandits who made the biggest cash haul in North America; the large car is the armored automobile held up by the gangsters. The police are shown questioning witnesses.

HON. ARTHUR W. ROEBUCK

Attorney-General of Ontario, who is studying ways and means of tying up the assets of relatives and friends of any kidnappd person in order to prevent payment of ransom, as an outcome of the kidnapping of John S. Labatt of London.

Assistance For B.C.

Ottawa To Advance Funds For Relief Purposes

Victoria.—The Dominion government will assist British Columbia in the financing of direct relief to March 31, 1935, which will amount to approximately \$2,800,000 in addition to the \$1,200,000 grant from the federal government, John Hart, minister of finance, announced.

Mr. Hart returned here from Ottawa, where he spent several weeks negotiating for financial aid for the province.

Mr. Hart completed arrangements for a loan from the Dominion of \$2,000,000 to meet a maturing obligation in New York and also for an advance of \$375,000 on account of the deficit in the accounts of the last fiscal year.

He also negotiated a loan to the province of \$1,000,000 for advances to municipalities unable to carry their share of direct relief.

Mr. Hart stated the Dominion has agreed that, on all the province's indebtedness to the Dominion, the interest rate will be 4½ per cent. instead of 5 per cent., in line with a general fall in interest rates.

The minister said Prime Minister P. B. Bennett had agreed to loan the province \$1,000,000 for a public works program as the result of representations made by Premier T. D. Pattullo for a loan of \$5,000,000.

A Woman President

Predicts A Woman Will Head U.S. Government Within A Generation

Chicago.—A woman president of the United States within a generation was predicted by Miss Lillian D. Rock, secretary of the National Association of Women Lawyers.

"I expect that within my own lifetime some brilliant woman will make her way from the ballot box to the presidency," she told the association's annual convention.

"All of our country's presidents have gone forth from women. What is to prevent woman herself from going forth to occupy this exalted post?"

Noted Explorer Dead

Sydney, Australia.—Sir Edgeworth David, noted explorer who led an expedition to the south magnetic pole in 1909 and also took part in Sir Ernest Shackleton's early-century Antarctic explorations, died at his Hornby, N.S.W., home.

Permanent Seat On League Of Nations Is Offered To Russia

West Makes Clean Sweep

Creameries Capture Butter Awards At Canadian National Exhibition

Toronto.—Western Canada creameries made a clean sweep in the butter awards at the Canadian National Exhibition. St. Boniface Creamery of St. Boniface, Man., won the silver cup for the highest scoring creamery butter exhibited, being awarded 97½ points for their entry in the section for a 56-pound box of salted butter. They also won the creamery, salted, 56-pound box with 97.5 points.

Swift Canadian Company, Ltd., of Neepawa, Man., was adjudged winners for a 14-pound box of salted creamery butter and 14-pound box of unsalted creamery butter with 97.3 points in each. Premier award in the class for salted creamery butter, 20 pounds in one-pound prints, went to the Manitoba Co-operative Dairies, Winnipeg, with 97.3.

Other results with figures awarded for flavor followed by total score and place in group:

Creamery, unsalted, box 14 lbs.: Second prize group—Saskatoon Dairy Pool, Saskatoon, 41.8 (first place); Sask. Co-op. Creameries, Saskatoon, 41.8, 96.7 (fifth place).

Creamery, salted, 14-lb. box:

First prize group—Sask. Co-op. Creameries, Saskatoon, 42.0, 96.9 (eighth place).

Third prize group—Saskatoon Dairy Pool, Saskatoon, 41.0, 95.7 (sixth place).

Fear Five Men Drowned

Thrown Into Columbia River When Cable On Cage Broke

Revelstoke, B.C.—Hope has been given up that there were any survivors among the five men who were thrown into the Columbia river when the cable of a cage in which they were crossing the stream broke.

One man of six in the cable cage, Roy Palmer of Winnipeg, reached shore and two others were seen struggling 400 yards down the rushing water, but apparently they did not reach safety.

The men were employed in the relief camp at 10-Mile on the Big Bend highway, and were amusing themselves on their off-work Sunday in taking an exciting ride across the river.

May Abrogate Treaty

Japan Will Not Adhere To Washington Treaty Unless New Plan Is Adopted

Tokyo.—Japan will abrogate the Washington naval treaty of 1922 unless other signatory powers "give evidences of favorable consideration to a new scheme for limitation of armaments which Japan will propose," a foreign office spokesman announced.

The spokesman indicated the proposal would be made during London discussions preliminary to the 1935 naval conference and that the attitude of the powers during and after this conference would be closely watched.

Officials From Ottawa To Investigate Drouth Conditions In West

Ottawa.—A party of four permanent government officials, two from the department of finance and two from agriculture, will confer with the government of Saskatchewan on ways and means to meet the problem of drouth and farm relief.

Cabinet council wrestled with the Saskatchewan situation during two sessions and while no official statement was forthcoming it was learned the government had decided to place experienced men in that province for a period during which they will work with local government officials in an effort to ascertain in what manner assistance may be extended.

So far as could be learned no decision has yet been reached with respect to schemes involving the migration of farm communities to more northerly districts, and moves to bind and rejuvenate drifting top-soil by sowing a binding grass, and by forestation.

Even were it possible to find suf-

London.—The road to League of Nations membership now stretches straight and smooth before Soviet Russia.

Three powerful European nations—Great Britain, France and Italy—joined diplomatic hands to remove obstacles to the great Communist nation's admission, and an authoritative British source was prepared to describe Russia's entry as almost assured.

A permanent seat on the league council also was promised the Soviet, this source said.

Great Britain, France and Italy now hold the only permanent council seats and their united support of the Russian cause was regarded as making its success certain. That Russia demands a permanent place on the council as the price of her entry was confirmed in diplomatic circles.

"The British, French and Italian governments," a foreign office spokesman said, "are making inquiries through their representatives in various capitals with regard to the attitude of the governments to which they are accredited toward the entry of the Soviet Union in the League of Nations."

Had not those inquiries met with universal affirmatives, high British sources agreed, the statement would not have been issued.

An invitation is expected to be issued to Russia soon after the league assembly meets Sept. 10 at Geneva. Acceptance, it is understood, is assured.

France Is Worried

U.S. Move Has Made Economic Problems More Acute

Paris.—France's fear of a "50-cent dollar" grew following the speech of Henry Morgenthau, American secretary of the treasury, which was nervously interpreted here as forecasting further inflation.

The dollar weakened here, but a major part of the gloom was caused by belief that the pound was likely to follow, thus fanning an already hot devaluation campaign in France. As the gap between world prices and high gold prices is widened, both supporters and opponents of a cheaper franc agree that French financial and economic problems have become more serious.

London.—Financial London discussed with interest the Washington speech of United States secretary of the treasury, Henry Morgenthau, and could find no signs of inflation in details of the new franc cable. Financial writers stressed the point that if gold profits are to be used to write off indebtedness that is the "reverse" of inflation.

May License Wheat Exports

Paris.—Export licenses and small grants were proposed by Henri Queuille, minister of agriculture, as means of disposing of France's wheat stocks, at a meeting of the radical Socialist group of the chamber of deputies. The meeting called for granting of wide credit facilities to agriculture groups.

Officials From Ottawa To Investigate Drouth Conditions In West

efficient arable acreage in northern Saskatchewan upon which to locate the 40,000 families living in the drouth areas of the south, it would mean at least \$20,000,000 expenditure for a country already faced with a financial situation difficult to comprehend.

In addition to the Saskatchewan problem the same situation is said to exist in a lesser degree in the other two prairie provinces. What steps if any, will be taken in the way of reclaiming the dried-out southern wheat fields remain to be decided after experiments being carried out by the department of agriculture have been completed.

Three prairie governments will seek the co-operation of the federal government to find an outlet for 125,000 surplus cattle from the three prairie provinces.

Of this number approximately 75,000 are in Saskatchewan, 20,000 in Manitoba and 30,000 in Alberta.

THURSDAY, SEPT. 6, 1934

NOTES BY THE WAY

"HISTORY rubs shoulders with modernity in Montreal, and the old and new are strikingly blended. Back in 1534 Jacques Cartier, whose 400th anniversary of the discovery of Canada was recently celebrated at Gaspe, was the first white man to ascend the River St. Lawrence, and after returning to France, he came back in 1835 and ascended the river to the site of Montreal, where he found an Indian village, Hochelaga. The nearby mountain he named Mount Royal, or Mont Real, the name later applied to the city itself and to the island on which it is located."

WITH this historic background, there is much to interest the visitor in Canada's metropolis and the writer was fortunate in meeting a former school teacher of the Crows Nest Pass in the person of Mr. Eric Muncester, who taught high school at Blairmore, was for a brief period secretary of the Masonic lodge there, and who proceeded to Montreal to engage in newspaper work on the Montreal Witness, of which the 93-year-old John Ridpath Dougall is the proprietor. Eric Muncester was a capable guide to whom we are indebted for spending a delightful day in viewing numerous places of historic interest, including the famous cathedral of Notre Dame de Montreal, opened for worship in 1829; the Chateau de Ramezay, erected in 1705 by the French governor whose name it bears; the old and the new court houses, the Place d'Armes, a famous parade ground; Fletcher's Field and many other historic places.

TO contrast the new with the old, he piloted the writer into St. James Street, where we viewed the seats of the mighty, even into the private office of the president of the Bank of Montreal, and also of the general manager, but as it was Saturday afternoon, neither of the gentlemen were around. Parc LaFontaine, one of Montreal's fine parks, was thronged with thousands of people on Saturday evening, where a beautifully illuminated fountain which displays thousands of color combinations, is a centre of attraction, and which people sit and watch for hours on a warm evening. French is the predominating language here, and the policemen politely warn you in both English and French to keep off the grass if you are tempted to take a rest.

TO Lord Atholstan the delegates to the Canadian Weekly Newspapers Association convention were indebted for a delightful reception and garden party at "My Mother's Home," on Dorchester street, formerly the first residence in Montreal of the late Lord Strathcona, and where he entertained the present King and Queen when they were Prince and Princess of Wales. Lord Atholstan, proprietor of the Montreal Daily Star, purchased this home about five years ago and donated it as a home for ladies of refinement and culture in reduced circumstances, in memory of his mother, to be thereafter known as "My Mother's Home." Here Mr. S. Morgan-Powell, assistant editor-in-chief of The Star welcomed the visitors on behalf of Lord Atholstan, "peer of the Fourth estate" in Canada, to which a suitable reply was made by Adam Sellar, editor of the Huntingdon Gleaner, and president of the C.W.N.A. for the ensuing year.

A VISIT to Montreal would not be complete without a trip on the St. Lawrence, and the visiting newspapermen are indebted to Canada Steamship Lines for a few hours trip and luncheon on the S.S. "Quebec," a palatial river steamer, from which a comprehensive view of the harbor was obtained as we swung out into the river. By night the large cross on Mount Royal is discernible for miles, being electrically lighted, and the new Harbour Bridge is a graceful structure over two miles long, under which ships pass when entering the Port of Montreal.

MOUNT Royal Park provided an interesting diversion for Sunday afternoon, and a cricket match was in progress between two local clubs, but which apparently held little interest except for those who may have played the game back in Old England. Automobiles are not allowed in this park, and if you want to ride instead of using "shanks' mare," you may hire a horse drawn cab or landau, which will take you to the lookout where a splendid view of the city is obtained. The absence of automobiles gives a peaceful charm to this place, and besides it is much safer for the children of the hundreds of city folds who spend Sunday afternoon there.

THE writer also attended one of the principal Anglican churches on a warm Sunday morning, and the congregation was no larger in comparison than those of the smaller towns. Speaking of churches, walking towards Windsor station, on Sunday evening, after a very hot day, the peal of bells at the old Anglican church opposite the station was heard playing hymns, and it seemed very appropriate that it should be playing "As pants the heart for cooling streams," for everyone was wishing for cooling streams and ice-cold drinks at that particular time, and there did not appear to be any great rush to seek the coolness of the church interior, for the curate was standing on the steps with a heavenward

gaze as if longing for rain, while the cabhorses in Dominion Square stood with drooped heads and most of the drivers were taking a doze.

SO our five days stay in the city came all too soon to a close. There was much more we would liked to have seen; many more interesting people to meet, including several former acquaintances, and it was with reluctance that we boarded the C. P. R. train for Winnipeg, to spend a short visit in the gateway city of Western Canada.

(Third of a series of articles on the Editor's visit to Montreal to attend the annual convention of the Canadian Weekly Newspapers Association, and the 75th anniversary of the Canadian Press Association.)

Local News

Mrs. H. E. Gate left on Saturday to spend a holiday in Vancouver

Miss Norma Plante and Miss Eileen Richards left on Wednesday morning for Victoria where they will enter the Royal Jubilee hospital as nurses-in training

Mrs. James Glendenning recently returned from Chicago where she has spent several weeks, and while there she attended the International convention of the Pythian sisters as a delegate from Alberta grand lodge.

John Pratt, assistant surveyor at McGillivray mine, who was injured about five weeks ago, is showing gaining, and is able to take short walks daily. His back is still encased in a plaster cast, which hampers his movements, but otherwise he is quite cheerful and is pleased to be out for a short time daily.

The trip to Vancouver for two adults, awarded as the prize of a draw put on by the local Knights of Pythias, was won by Mrs. Beale of Bellevue. The draw was made at a dance last Friday evening in the K. of P. hall here, at which there was a capacity house. It is reported that the lodge netted a profit from the ticket sale and dance.

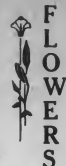

Mr. and Mrs. D. E. McLean of Hanna, and Mrs. Lang of Govanlock, were the guests of Mrs. T. B. Smith for a few days last week. All were former residents of Coleman. Mr. McLean being manager of the government store, and Mr. Lang was night agent at the C. P. R. Mrs. T. Flynn entertained the visitors as dinner guests during their visit.

The electrical lighting system, which has received much favorable comment in the new Italian hall, was installed by Modern Electric, and the modern home of J. S. D'Appolonia recently completed was fitted up with electric wiring and equipment by the same firm. Their store carries a complete range of equipment and supplies, and experienced workmen will install same at reasonable cost.

James Strachan, barrister, of Nal, left on Aug. 29 for Montreal, where his father is in hospital, after landing there from a trip almost around the world. He has been in poor health for some time, and was ordered a cruise by his doctor. For many years Mr. Strachan was an inspector of mines in British Columbia, and is well known through out the Pass towns. He originally came from Scotland.

A business executive addressing a number of customers, remarked: "For goodness sake send us type written letters which we can read easily, for poorly written letters are laid aside till we have time to read them, while type written letters are given prompt attention." To overcome this handicap, buy a Remington portable typewriter from The Journal office, which for students can be purchased on the payment plan of \$5.00 monthly.

Many business places are installing additional lights both inside and out, now that a lower rate is in effect. A light outside the town hall shows up the building rather imposingly at night, and it is anticipated that stores on main street will follow suit and display more light now the days are growing shorter. Mr. Peet, electrician, says he is quite busy attending to orders. It is reported the electric sign at the Grand Union will be put back into use. Main street will present a much brighter and more attractive appearance.

TAKES OWN LIFE MINUTES BEFORE HIS POLICY EXPIRED

LONDON.—Unable to keep up payments on his insurance policy, Mayor Charles St. John Rowlandson, 56, retired army officer, shot himself in a taxicab at 2.58 p.m. on the day upon which, at 3 p.m., his policy would have expired. The suicide took place in St. James Street W., after he had asked the driver to tell him the time by the clock on St. James' Palace. Whether his estate will be allowed to collect the insurance money may be dependent upon the accuracy of that hundred-year-old clock. The policy is for £50,000.

Rowlandson had many obligations, and in a note addressed to his solicitor, he stated that if he filed his petition, many people who believed in him would suffer terribly. He realized that he was technically seeking to defraud the insurance company, he said.

The coroner described the suicide as cold-blooded and calculated, and recorded a verdict of felo-de-se.

The insurance company have not yet decided what course they will take—whether they will pay or otherwise. It is generally considered contrary to public policy for a man or his estate to derive any benefit from his own felonious acts, and therefore, irrespective of any clause in the policy, it is believed that no recovery could be made by the representatives of an insured person who committed suicide while of sound mind, or died as the results of a duel, or by the hands of justice.

THE HEIGHT OF IMAGINATION

The American Weekly, one of the Hearst publications, devotes a whole page of its last issue to the sensational Brownlee-MacMillan case, which was tried recently at Edmonton. It was almost a cinch that the publication in question would get hold of it, much the same as a vulture seeks out choice bits of carrion to gobble up. So really we were not surprised when we saw it there. But this is not the first western Canadian sensation that Chicago papers have featured. Well do we remember when the supposed gold rush of the Lost Lemon Mine took place here three or four years ago, when the Chicago Blade and Ledger printed a thrilling story of the event and showed a picture of men and women holding sacks at the foot of the Livingstone Range, while others were up on top of the mountain loosening the big gold rocks so that they would roll down into the sacks. The artist who sketched the picture from the description had a fertile imagination, and drew upon it to the limit. —Clareholm Local Press.

An Irish priest offered sixpence to the boy who could tell who was the greatest man in history. "Christopher Columbus," answered one. "George Washington," answered one. "St. Patrick," shouted a bright little Jewish boy. "The sixpence is yours," said the priest. "But, why did you say St. Patrick?" "Right down in my heart I knew it was Moses," said the boy, "but business is business."

"Walpole once wrote," said the fellow, dreamily, as he parked the car, "that the world is a comedy to him who thinks, and a tragedy to him who feels."

"Well?" said the girl.

"Well," continued the fellow, shutting off the lights, "I think I'm about to get tragic."

Roughhead Wins West Kootenay Junior Tennis Championship

'Chick' Roughhead climaxed a year of winning tennis on Monday last, when accompanied by Dick Shone he travelled to Trail and was successful in winning the West Kootenay junior championship. He now holds both the Southern Alberta junior championship and the West Kootenay. Chick also reached the third round of the open singles where he was eliminated after he had been called upon to play from 7 a. m. Sunday morning till 6 p. m. that evening. Partnered with Shone they went far in the men's doubles before being eliminated. Roughhead is also in the final of the McGillivray Cup, a local competition, and now stands a good chance to win that competition.

E. Price acted as chaffeur to the party on their trip to Trail.

Five Men Went Fishing

Bob Penman, Bob Jenkins, Jim Barclay, Jim Duncan and Edgar Thomas went on a fishing trip over the week end, but according to a first hand report from Bob Penman, fishing was "not so good." The season is advancing and soon fishing days will be over till next year. It is reported that the boys out fire fighting in Castle River district have been making good catches to add to their daily menu. So far Joe Plante's record of nineteen fish in fifteen minutes is a record for this season. This remarkable catch was made at Carbondale river.

Engagement Announced

Mrs. A. Halworth, of Bellevue, announces the engagement of her daughter, Ira May, to Fredrick J. McDowell, second son of Samuel McDowell, of Blairmore, and the late May McDowell, the wedding to take place the end of September in Montreal.

WORLD HAPPENINGS
BRIEFLY TOLD

President Roosevelt has received a report saying employment in United States has increased 4,120,000 since he took office.

Dr. J. A. MacArthur, 86, pioneer leader of the medical profession in Manitoba for more than half a century, died recently in Winnipeg.

Extension of the recommendation system to supplant examinations in the schools was urged by Duncan MacArthur, deputy minister of education for Ontario.

Veteran of both the Boer war and the Great War and former Arctic trader, Major M. Montague Marsden, 52, is dead at Vancouver from a heart infection.

The Australian cabinet considered British protests against the new import duties on Lancashire textiles and ruled the tariffs are to be maintained.

The Indian governments ban on flying over the northwest frontier will lengthen the London to Melbourne air race in October by 1,000 miles.

Henri Gagnon, Quebec, president of the Canadian Press, and managing director of the newspaper Le Soleil, has been elevated to the rank of an officer of the Legion of Honor of France.

Persia has informed the League of Nations it will stand as a candidate for China's seat in the assembly. China's mandate expires this year and Persia considers itself qualified to represent Asia.

Captains of Great Lakes steamers say low water levels in the lakes have uncovered rocks and sandbars, and cargoes have had to be considerably reduced from other seasons. Vessels have grounded this summer in places previously considered safe, they declared, and the captains had to stay on the bridge continuously.

Cheap Television Sets

New System Developed Promises Sets At Low Cost

A new system invented by Mr. R. W. Hughes, of Plymouth, England, may result soon in the production of cheap television sets for all classes. Mr. Hughes said he thought a television receiver, built with light source and amplifier, could be mass produced to sell at \$10 or less.

With his somewhat crudely-constructed apparatus, Mr. Hughes is able to project a 100-line picture on a screen two feet square.

A system of vibrating mirrors causes a small but instant spot of light to travel over the screen and form the images.

Mr. Hughes is also developing an apparatus which, he claims, overcomes the problem of synchronizing—one of the chief difficulties of television—and also holds the picture steady for considerable periods.

Firms in this country as well as in Germany and the United States have been interested in the invention, and, it is said, that successful negotiations have been concluded with a British company.

Mr. Hughes has been working for nearly two years on his new apparatus and has built a special transmitter to test his receiving apparatus at any time.

Must Be Improved

Canada Must Raise Better Hogs To Capture Market

The Canadian farmer lost \$12,000,000 in 1933 by reason of the fact Danish hogs were better than Canadian hogs, J. S. McLean, president of Canada Packers, says in the annual report. Unless Canadian hogs are improved, he said, the same amount will be lost each year.

"The securing of this \$12,000,000 lies in the hands of the Canadian farmer," he continued. "He alone can do the job. And if it is done, he will reap the entire benefit." The "certain lack of confidence" existing between the farmer and the packer was due chiefly to the farmer.

Stay Was Uncertain

A social worker on her first visit to a prison was greatly impressed by the sorrowful attitude of one man she found. "My poor man," she sympathized, "what is the length of time you'll spend here?"

"All depends on politics, lady," replied the mournful one. "I'm the warden."

The first merry-go-round at Coney Island was introduced by the grandfather of George Raft.

Seven thousand stars can be seen by a person with average sight.

The White Sea Canal

Has Provided Leningrad With Cheaper Means Of Transport

One of the most revolutionary accomplishments of the Soviet Union is the construction of the White Sea Canal connecting the Baltic and the White Sea. Heretofore Russia had two water routes leading to Europe—one by way of the Black Sea, the other by way of the Baltic—and both could be blocked.

Now, however, Leningrad can no longer be shut off from the outer world by a blockade of the Baltic, for ships of commerce or war can make their way northward by the new canal to the White Sea and sail around Sweden and Norway. Not only will Leningrad become more important, but a district rich in phosphates, iron ore and lumber will be able to ship its products far more economically than ever before.

Nobleman Runs Coffee Stall

Duke Of Manchester's Son Hopes To Start Chain

Lord Edward Montagu, second son of Duke of Manchester, the London Express said, is running an outdoor refreshment stall at Maidenhead, famous Thames riverside resort where there are many country clubs. His "coffee stall" is mounted on the chassis of an automobile, from which he serves coffee, other soft drinks, sausages and sandwiches.

Most of his patronage is from taxi drivers and chauffeurs who bring clubmen to Maidenhead from London.

Lord Edward, who is 28 and a former rancher in the Canadian west, told a reporter he started his business with £11 (about \$5) in cash and made \$4 within 24 hours. He hopes to start a chain of stalls, he asserted.

499
A PRETTY HOME FROCK WITH WRAP-AROUND SLIMMING LINES—SIMPLE TO MAKE

The very charming model shown for today's pattern is in printed cotton in yellow and white with white collar and pocket.

It's the favored wrap-over type so easy to slip into.

While extremely attractive for a normal figure, this model is also quite suitable for heavier figures.

The surplus bodice and wrap-over skirt, being very slenderizing.

Another charming scheme for this model is multicolored checked sweater with the collar and pocket of navy blue linen.

Style No. 499 is designed for sizes 16, 18 years, 36, 38 and 40 inches bust. See pattern envelope for material requirements.

Price of pattern 20 cents in stamps or coin (check is preferred). Wrap card carefully.

A VETERAN JOURNALIST

John R. Dougall, for 63 years editor-in-chief of the Weekly Witness, of Montreal, and for 73 years a journalist, celebrated his ninety-third birthday on August 17th. He is the last remaining editorial link with pre-confederation days.

Pirates Bold

Are Now Incorporated Into The Chinese Army

The pirates are soldiers now. Thus has fate dealt with the 60 Chinese marine marauders who were promised a firing squad for creating an international incident two months ago. The pirates boldly commanded the British steamer Shuntien and kidnapped six British subjects and 18 Chinese.

The pirates were frightened into freeing their captives and lost most of the loot they unloaded from the steamer. But the pay-off is that they have been taken into the Shantung provincial army.

"They were sincere in their desire to surrender and become soldiers," explained Han Fu-Chu, governor of the province, who consented to make the pirates part of his army.

A "sweeping search" for the kidnappers was ordered when both Great Britain and the United States became aroused.

Becoming Good Customer

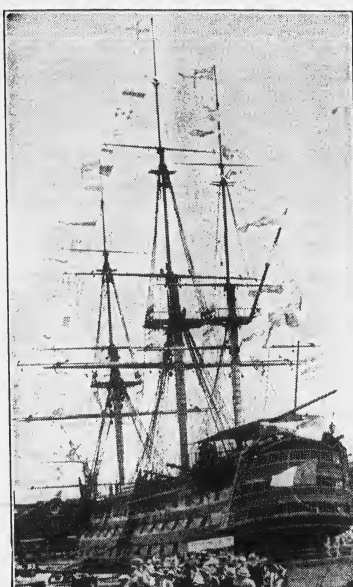

Bahamas Islands Are Taking More Goods From Canada

The Bahamas have become one of Canada's best customers, imports from the Dominion now ranking first place. The total value of goods bought from Canada is \$1,305,790, an increase of 5.5 per cent. over the previous year. Practically all the potatoes used there come from Canada. Canada is also the chief supplier of butter, flour, oats, condensed milk, rubber and canvas boots and shoes. Last year the United States supplied automobiles to these islands to the value of \$13,435 and Canada \$12,290.

Bitten by a lamb a man's death was the subject of an inquest at Pontefract, Herefordshire, recently.

Slum clearance of fifty acres in Bristol will cost a million pounds.

HISTORIC WARSHIP RECEIVES VISITORS

Nelson's old flag-ship, the "Victory", all befagged and gay, waiting to receive visitors during Navy Week at Portsmouth.

Your Handwriting Reveals Your Character!

By LAWRENCE HIBBERT
(Grapho-Analyst)
(All Rights Reserved)

(Editor's Note: This is the first of a series of fascinating articles on this very interesting subject of Character Reading from Handwriting. The author, a well-known handwriting expert, has an interesting announcement to make following this article.)

There is always something thrilling in the mysterious. For thousands of years, people have paid money to fortune-tellers in return for a glimpse—sometimes accurate, if flashy; and sometimes, amazingly prophetic—of the future. Down through the ages, people have yearned for an opportunity of tearing aside the veil of the unknown, and to-day there will always be a thrill of the mystical or occult in these foretellings of the future.

The astrologist who looks at the stars, and predicts your future from them; the soothsayer who peers into the globe and tells your fortune; the palmist who scrutinizes the hand for the tale-time it shows; the phrenologist who focuses on the head to the revelations it discloses, down to the ever-popular amateur at the tea-table who focuses on the tea-leaves to find his followers who swear by them.

And, marching a path that is built on solid scientific deduction, Grapho-Analyst is gaining an ever-increasing body of adherents who find his analyses of character of times sensationals accurate.

Grapho-Analysis, the science of character delineation from handwriting—what is it really?

Robert Saunder, the famous European cryptologist, says: "There is no such thing as handwriting, but only brainwriting." This is because the impulse and motive power come from the brain. Writing is no mere muscular act. If you think it is, a book to write a letter without reading a book! The Physicians' Times Magazine some time ago made the statement that "the nerves at the extreme finger-tips are extraordinarily sensitive, and traces of grey matter, similar to that in the brain, may be found."

Throughout the world, Grapho-Analysis is gaining recognition as a practical science. In a number of European universities and colleges the subject is being studied as a regular part of the curriculum. In the everyday affairs of life it is finding increasing application.

Business men, teachers and doctors are using it to supplement their own specialized knowledge. Indeed, many of the largest commercial undertakings in the world submit to grapho-analysts the handwriting of applicants for important positions; it is being used more and more frequently in criminal and civil courts, and even lawyers, hesitating before stepping off the land of matrimony, consult a Grapho-Analyst for an analysis of the handwriting of their intended bride or bridegroom.

Do you want a personal analysis of your handwriting? Do you want to know what your friend's handwriting tells? A character analysis may open the doors of opportunity to you, and certainly it will astonish you with its revelations of character and talents. Send a letter in your normal writing and state your date of birth. Enclose with 10c coin, (for each specimen) and 3c stamped addressed envelope to: Lawrence Hibbert, Grapho-Analyst, c/o Winnipeg Newspaper Union, 175 McDermott Ave., E., Winnipeg. Please allow at least two weeks for a reply, which will be mailed as soon as possible.

Honey should be kept in a warm place, economics specialists advise.

SUNDAY SCHOOL LESSON
SEPTEMBER 9

HEZEKIAH LEADS HIS PEOPLE BACK TO GOD

Golden Text: "God is gracious and merciful." II Chronicles 30:9.
Lesson: II Chronicles Chapter 30.
Devotional Reading: Psalm 72:1-4.

Explanations And Comments

Ritual Was Made for Man and Not Man for Ritual, verses 24. "Every thing regarding form is elastic in the interests of the soul," Nisan, the first month of the year, corresponding to our month of April, was the regular time for keeping the Passover, but in the reign of Hezekiah it could not be kept at that time, because a sufficient number of the priests had not sanctified themselves (undergone certain washings, abstinence and forms), nor had the people assembled at Jerusalem, owing to the fact that the temple was not cleansed until the sixteenth day of Nisan, and the fourteenth day was the time for beginning the Passover. Accordingly, the king and taken counsel, and his princes, and all the assembly in Jerusalem, to keep the Passover in the second month. The law (Numbers 9:10, 11) allowed those who for good reasons were prevented from observing the Passover at the regular time to celebrate it in the second month, and the thing was right in the eyes of the king and all the assembly. Dr. Charles Reynolds Brown contrasts Hezekiah's broadminded action with the narrow scruples of those chief priests and Pharisees who were intent upon putting Jesus Christ to death upon the cross at another feast of the Passover, and who would not venture into Pilate's judgment hall lest their holy feet should suffer defilement and make them unfit to share in the sacred feast of the Jewish Church.

The Royal Proclamation to Judah and Israel, verses 1 and 15. So a decree was issued for every one, on Beersheba to Dan, to come to Jerusalem to keep the Passover. The customary phrase for the length of the land was "from Dan to Beersheba," the chronicler, however, in writing the history of Judah naturally mentions the southern city first. A reform was needed, for they had not kept the Passover in great numbers in such sort as it is written: see Exodus 12:6. Local sanctuaries had been established throughout the land (2 Kings 18:4); Hezekiah would re-establish the supreme importance of the temple, so he wrote letters to all the cities of Judah and sent them throughout the land by the posts, or couriers. His message was: "Ye children of Israel, turn again unto Jehovah, the God of Abraham, Isaac, and Israel (such as reference to the Hebrew word for God is common in the Old Testament); it served to remind the people of God's love to them in the past, that he may return to the remnant that are escaped of you out of the hand of the kings of Assyria."

And the king and all the assembly had but recently happened and Hezekiah urged those who had not been carried away into captivity not to bring upon themselves the punishment that had just befallen their fathers and brethren. "Be not stiff-necked as your fathers were, but yield yourselves unto Jehovah, and enter into his sanctuary," he counseled.

Little Journeys in Science

INSECTS

(By Gordon H. Quest, M.A.)

Insects are our greatest friends—and our greatest enemies. Some aid man and some harm him. Once in the history of the earth it appeared as if they might inherit the earth and gain control of it. Scientists have counted 340,000 different kinds of insects that are living to-day. Of this vast number man has domesticated and used the products of the labor of only one—the honeybee.

It is of interest to know that an insect that can crawl through the eye of a needle has a little heart and other organs. Insects reverse man's method and wear their skeletons outside. They are without lungs but air enters to every part of the body through a large number of microscopic tubes. This system of obtaining air works so efficiently that it is doubted whether an insect's blood is ever impure.

In regard to intelligence, many an insect has been shown to be in proportion to its weight, than have human beings. A spider is a very expert bridge-builder. In Texas are found ants which clear the ground around their hills of all plants except those that produce such seeds as it wishes to eat. Bees have, in proportion to their weight much more intelligence than man. House-flies are not noted for their brain power but they are experts with their wings, which they flap 330 times a second; bumblebees, 240; wasps, 110; dragonflies, and bees have, 9.

Among the most useful insects is the bee, which supplies honey, and in some countries produces bee bread for the support of human life. Silkworms furnish material for clothing, and their culture is an important industry in many countries. The common housefly is one of the most intelligent in Europe for the manufacture of vinegar. The cochineal insects supply a valuable coloring material, while even the grub is used as a food in the West Indies.

Among the insects which are most harmful to man may be included the Hessian fly, potato bug, chinch bug, army worm, cotton boll weevil, cotton boll moth, and grasshopper, all of which attack growing crops.

REDUCING MADE HER LOOK YOUNGER

A Burden Of Fat Gone

Here is another case where the trim, slim figure of youth has displaced the coarse, fat outline of middle age. It is a housekeeper writing. She says:

"I cannot say what weight I was, but I was very fat—a burden to myself. I have taken three boxes of Kruschen Salts, and now I am quite slender. I am over 56, and people take me for 40. I am more than proud of myself. You can take it from me that every word of this is true. I took a teaspoonful in hot water every morning till I had three bottles. Now I only take half a teaspoonful each morning. I cannot recommend the Kruschen Salts enough for they are worth their weight in gold. The Kruschen Salts combat the cause of fat by assisting the internal organs to perform their functions properly. I throw off each day those waste products and poisons which, if allowed to accumulate, will be converted by the body's chemistry into fatty tissue."

OCCASIONAL WIFE

By EDNA ROBB WEBSTER

Author of "Joretta," "Lipstick Girl" Etc.

SYNOPSIS

Camilla Hoyt and Peter Anson, young and in love, marry secretly, deciding to live their own lives until Peter is able to provide for her. Peter is a young, struggling sculptor trying to win a competition for a scholarship abroad and Camilla is the adopted daughter of a wealthy family. She is not to inherit money when she comes of age and so is studying commercial art in the hope of finding an agency job. One of the story is Avis Werth, another wealthy girl who is trying to win Peter. Sylvia Todd, Peter's model and Gus Matson, his former roommate with whom he has quarrelled. After a party at an exclusive club when the rest of the members of the party go to a cabaret to continue the party, Peter and Camilla slip off to the beach by themselves and fall asleep on the sand. When they awake it is early morning and Avis and another boy are standing near them. This makes it necessary for Camilla to announce before the party that she and Peter are married. Camilla urges Peter to accept some of her earnings to help him along, but Peter refuses and they quarrel. After Camilla has gone from the studio, Avis Werth convinces Peter to accept a loan of \$1,000. Peter finishes his exhibit and asks Avis and Camilla for a suitor's name to a name for it. Camilla suggests "Eager Youth" and Avis "Inspiration." Peter adopts the latter title and Camilla, heartless, goes to Peter's studio for quiet and then, Peter and Avis follow later, and as the lights are turned on, see the statue has been shattered to pieces. Avis accuses Camilla of doing this, and Camilla, stunned by the disaster, and hurt and horrified by the accusation, faints.

At Camilla's suggestion, Peter enters as his exhibit a statue he had sculptured especially for her as a wedding gift. They named it "Land of Hope". Camilla's advertising campaign

MAKE YOUR FALSE TEETH HOLD FAST

Eat, talk, sing and shout and never fear embarrassment. Your false teeth stick all day long when you apply the new... they know it's the best! Costs but little—any druggist.

"Peter can have all the Paris scholarships he wants—me for the gold green. I only wanted to go to Paris to tide over the depression, anyway. First crack after the exhibit, one of the big money kings buys my 'Flight' and gives me an order to do a larger copy for the entrance to the airport. Then I almost collapsed when fortune threw her arms around me again, and a novelty dealer bought the patents on some little modernistic figures that he will manufacture by thousands to put in five-and-dime stores. What do you say, is that a break or isn't it?"

Her face lighted with genuine admiration. "Indeed it is, and I'm awfully glad for you. I hate to think that you could do a thing like that to Peter—but since it came out all right, there must have been some reason in the whole plan. I'm glad you told me about it, Gus. I appreciate that it does mean something to me. It would have been a dreadful mystery to have hanging over us for all our lives. But don't be too vindictive and petty like that again, will you?" Camilla implored him.

"Not on your life, I won't. Me for the straight and narrow—and prosperity."

"I hope it continues for you," she smiled. "You have more good things in you to develop, I'm sure."

"Gee, but you're sweet. Tell you what, I might even write you a statement of confession to show to Peter sometime, if you will promise me to burn it right after he reads it. I don't care to have incriminating evidence like that around."

"You don't need to do that. If you wish me to tell Peter, I shall. He will believe me, of course. And he will be relieved to know how it happened. I'm sure he never believed that I did it, anyway."

"Well, I'd advise you to keep your eye on Avis Werth."

Camilla laughed with a deprecating gesture. "Avis doesn't worry me. But she did not believe what she said, and when Gus Matson had gone, she had huddled over her despair. Her thoughts leaped the expanse of land and ocean which divided them, and she visioned Avis and Peter on the boat together for hours and days. Then Peter—Peter a stranger and a novice; and Avis as familiar with the city, the customs, the language, as at home. Avis: seductive, amorous, subtle, confident, with everything to her advantage. Angry tears stung in her eyes.

After a night of restless pacing the decks and turning in to his berth, Peter emerged to a victory over his emotions. With bitter regret and angry resentment, he had slain love; and now looked upon the results dispassionately. Never again would he give rein to his emotions. He never again could be or would permit himself to love anyone as he had loved Camilla. Work and success were all that made life worth while, anyway.

He would devote every moment, every effort, every emotion to those elements. He would be hard and cold and grasping like the rest of the world—take what he wanted when he wanted it, accept what pleased his fancy, ignore all obligations to sentiment. He suspected that was the creed of all successful men—and women. Well, he would join their ranks.

He thought of Avis with a mounting sense of appreciation and gratitude. He had her to thank for so many things: his financial security, her influence in his behalf via the interests of John Danforth, even the truth about Camilla's unforgivable act.

Three more days of such stern reasoning and gradual reignment to his new creed had done much for Peter's state of mind. Avis had calmly observed this very obvious change and took advantage of it gradually.

She increased her personal attentions to him; made little intimate ventures which became more pronounced as the days passed slowly; played upon her conviction that no matter how much a man renounces love, he is the eternal lover and a conqueror of love that he cannot subvert without some demonstration of his emotional forces. She flattered and entertained him, exerted herself to be attractive and desirable.

All unconsciously, Peter's atten-

tion and ardor transferred themselves to Avis and almost before he was aware of what was happening, he found himself caught up and hurled along by the mighty force of his desires. Her nearness tantalized him, maddened him; until on that last magic evening of moonlight and sea breeze, when the emotions were strangely alive and alert with the anticipation of the morning's landing, he found his lips pressed to hers, himself holding her intoxicating fragrance in his arms, and all else obliterated.

"But—that man you love," he finally reminded her.

"That man—is you, Peter darling," she confessed.

He was dazed. "Oh—I begin to see light."

She laughed softly. "Dear Peter, you are simply too good to be true. Now that you know—that are you going to do about it?"

"I don't know," he confessed dejectedly.

After a little while, she smiled at him. "Oh, why think about that now? Tonight is tonight. Tomorrow is another day. Tomorrow, we reach Paris. There is so much to be done. You are going to be very busy. But we can see each other often, and you are settled, we can have such glorious times together—while we wait." She did not say what they would be waiting for, but it hung in the air between them.

His silence seemed to be an acceptance of her plans.

THE RHYMING OPTIMIST

By Aline Michaelis

THE MAN WHO DREAMS

Who is so wrong as the man who dreams, Trading the real for the thing which seems.

Shaping the days in the mold of his need, Building a world for his whim or his creed?

Who is so foolish, so futile as he, Who is so right for reality?

Who is so wise, so content with his lot, Who is so rich in the world of God?

Waiting, while months and years slip past, Caught in a net that binds him fast.

Shaped and bound in the web of dream, Lacking the zest of creation's scheme.

Missing the moor of eager strife, The sweat and toil that are part of life.

Lacking in triumph and mastery, Who is so cheated and cold as he?

Prefers Motor Cars

Pope Pius Gives Up Horses and Closes His Stables

The Papal stables, which once had accommodation for sixty horses, have been finally closed down. Pius XI, his cardinals and prelates, have all taken to motor cars. No more will the streets of Rome ring to the tread of the stately coal-black horses which used to draw the carriages of members of the Sacred College. Sadder of all at the change is the Pope's head coachman, or, as he is called, "the Holy Father's noble coachman," 80-year-old Rinaldo Jacchini.

Has Rare Specimens

The Dunsen National museum of New Zealand has two rare and perfect specimens of Moa eggs. These large, light-colored, resembling the ostrich, only larger, and confined to New Zealand, are thought to have become extinct more than 500 years ago.

Of the 92 known chemical elements, 17 have not yet been found in the free state.

Persia Cleared Of Beggars

Incurables Sent To Institutions And Able-Bodied Must Work

By a ministerial edict all beggars have been swept off the streets of Persian towns and even from the courtyards of mosques where for centuries they have begged for alms.

The lame, the blind and the insane, have been sent to institutions. The able-bodied have been put to work on the new railroad with the option of going to prison with hard labor for three years. For the work they do they are paid the minimum wage permitted by the state schedule for labor.

Only those who know the East can appreciate the scope of this reform. In Teheran, which has a population of 300,000, there were 22,000 beggars organized into fraternities, guilds and corporations sometimes dating back to the foundation of the city.

Islam forbade any interference with beggars on the grounds that alms are the surest road to paradise. The shah had to tread warily for the mosque courtyard was the beggars' chosen pitch, and the precincts of the mosque have always been sanctuary.

The sovereign determined to make religion see reason, and therefore persuaded the mujtahid of Isfahan, the highest Moslem dignitary, to send a chaplain to accompany him on an incognito tour of beggary.

The chaplain saw for himself the enormity of the racket. In due course the mujtahid issued his fatwa. "It is good to help the poor. It is evil to rob the poor. The beggars of this town are guilty of robbing the poor and must therefore be driven from the sacred precincts of mosques."

The mujtahid, a wise and learned doctor of Islamic law, also ruled that the Koran enjoined that the insane, the blind, the lame, and the sick should be treated with respect and consideration as being "afflicted by the most high God." It was not possible to respect them in the public places, and therefore they must be put away and tended.

Under-Sea Experience

Deep Sea Divers Are Blinded By Flashlight Explosion

Blinded for a time by a premature flashlight explosion, two members of the New York Zoological Society's deep-sea expedition spent an uncomfortable five minutes down at the bottom of the sea at Bermuda.

For several minutes after the blinding flash, Dr. William Beebe and his assistant, Otis Barton, could only grope sightlessly around the interior of the great steel ball in which they had been lowered 1,500 feet below the surface.

Sealed in their bathysphere, they had gone down to take photographs of strange sea monsters at that depth. But a short circuit exploded their four flashlight bulbs simultaneously—instead of singly—and their picture-taking was suspended.

By the time the explorers had been hauled back to the surface they had recovered their sight fully and were none the worse for their experience.

An Interesting Bible

Bible students are interested in a 301-year-old Bible owned by C. S. Cooper, of Windsor, Ontario, which has developed a curious quality of faintly discernible luminescence. Containing the books of the Bible, this volume contains the Apocrypha and one of the first concordances ever published. The type used is English script and very difficult for modern eyes. Mr. Cooper inherited the book from his father, S. Moorehouse Cooper.

Designed to make secure almost anything from a small bottle to a large door, a portable lock about the size of a 25-cent piece may be attached without the use of tools.

Little Helps For This Week

"The Lord bless thee and keep thee; the Lord make His face to shine upon thee and be gracious unto thee; the Lord lift up His countenance upon thee, and give thee peace." Numbers 6:24-26.

O Love how cheering is Thy ray: All pain before Thy presence flies; Care, anguish, sorrow melt away, Where Thy healing benediction arises.

O Father nothing may I see, Nothing desire of mine but Thee. —P. Gerhardt.

There is a faith in God and a clear perception of His will and designs which gives to its possessor confidence, patience, and a sweet composure under all varied and troubling aspect of events such as no man can realize unless he has felt its influence in his own heart. There is a communion with God in which the soul feels the presence of the unseen One in the profound depths of his own being with a vivid distinctness, and a holy reverence, such as no words can describe. There is a state of union with God, not often reached, but it has been attained in this world, in which all the past, present and future seem reconciled, and eternity is won and enjoyed; and God and man, earth and heaven, with all their mysteries are apprehended in truth as they lie in the mind of the infinite.—Samuel D. Robbins.

The Man In The Moon

Mythical Tenant Of The Lunar Planet Is Photographed

The man in the moon has posed for his first television snapshot. After smiling down for years into the earth's telescopes, lenses, the mythical tenant of the lunar planet has been photographed by television and the picture transmitted to a radio receiver.

Reproduction of the moon's likeness—the first recorded use of television in astronomy—was announced by Philo T. Farnsworth, 28-year-old inventor-scientist of Philadelphia.

Soured On The World?—That's The Liver

Wake up your Liver! No Calomel necessary

Many people who feel sour, sluggish and generally unwell make the mistake of taking salts, mineral water, laxative candy or chewing gum, or anything which only moves the bowels and ignores the liver.

What you need is to wake up your liver. Start your liver going the daily two pounds of liquid bile into your bowels. Get the stomach and intestines working as they should, once more.

Carte's Little Liver Pills will soon fix you up. Purely vegetable. Bile. Burs. Quick. Ask for them by name. Refuse substitutes. 25c. at all druggists.

NEW DOMINION FARM ACT GOES INTO EFFECT

At the last session of the Dominion Parliament there was passed an act of facilitate compromises and agreements between farmers and their creditors.

The act was drafted for the purpose of dealing with the farmers' financial difficulties.

The government had in mind to make the cost as inexpensive as possible and provide the simplest machinery possible.

Compromises or rearrangements may be effected of the debts of those farmers who are unable to pay, but whose statements indicate a hope of success.

Also where the indebtedness is out of all proportion to the assets, and in order to make a fresh start bankruptcy is the only solution, provision is made for an assignment at small expense.

The object of the legislation can best be indicated by quoting from the Preamble of the Act. "Whereas in view of the depressed state of agriculture the present indebtedness of many farmers is beyond their capacity to pay; and whereas it is essential in the interests of the Dominion to retain these farmers on the land as efficient producers, and for such purpose it is necessary to provide means whereby compromises or rearrangements may be effected of debts of farmers who are unable to pay."

The Act then makes provision for getting the farmer and his creditors together, and provides also for both sides getting a true statement of the affairs and a settlement then arranged on an equitable basis between the parties concerned.

The procedure is simple and easy. An official receiver will be appointed. To this man the farmer will go and the official receiver, will assist the farmer in preparing his statement and making his proposals to his creditors. This proposal and statement will go to each creditor, with a notice of the date and place of meeting. At this meeting the affairs will be frankly discussed, and a settlement arrived at. The filing of a proposal of settlement with the official receiver will act as a stay of proceedings, and no action can be taken against the farmer for a period of 60 days.

The legislation is the most advanced placed on the statute books of Canada and offers a solution to many of the debt problems of the farmers.

The act provides all the facilities for the debtor farmer and his creditor to get together and come to a settlement, and failing to be able to do this, each province has set up a Board of Review, which may make the provision for settlement, which shall be binding on all parties.

The new act came into effect in Alberta on September 1st. It is probable that the present Debt Adjustment Act of Alberta will be wiped out.

The new act will give farmers desirous of making a settlement an opportunity of doing so on a basis which should prove satisfactory to both debtor and creditors, and give the debtor farmer a chance to settle his debts and get a new start.

Joe Simpson, a gentleman of color, got a job on a railroad construction gang. The first day, the boss seemed to pile all the hardest work on Joe. He carried heavy timbers and rails all day. That evening, tired out, he approached the boss. "Boss, is you sho' you got my name right on de payroll?"

Boss: "Sure, Joe Simpson, S-I-m-p-s-o-n. Right?"

Joe: "Dat's right. I thought sho' you had me down as Samson."

Our Repair Department

is in charge of

Mr. Jack Gordon, formerly of Calgary

who has come to us direct from the Mechanical Dept. of General Electric. He is quite competent to take care of your radio troubles.

We carry the largest stock of Radio tubes in Southern Alberta as well as the latest testing machine. Prices on all wave sets range from **\$65.50 to \$225.00.**

All our goods are sold at national advertising prices and we give three months free service on all sets. Let us demonstrate to you the superiority of General Electric Radios.

FOR years your travels in the world of radio have been restricted largely to the regular Canadian or American broadcast stations. Now with a General Electric selective or all-wave receiver you can go further, exploring new lands and broadcast bands as you go. You will experience a thrill when you tune in London, Berlin, Moscow, or, nearer home the exciting police calls, aircraft signals, or the interesting amateur programs.

Location and atmospheric conditions naturally affect foreign reception, but properly installed General Electric short-wave sets will give you the best in radio. See and hear these new radios at our show rooms.

For homes without electric current, short and long wave GE Battery Radios are available.
